Det går bra att köra nästan vilket program som helst från en terminal! Kolla <https://www.cyberciti.biz/faq/howto-run-firefox-from-the-command-line/>

Ex.

Firefox Start Browser From The Command Line

You can find out full path to firefox with the following [type command](#):

```
type -a firefox
```

To open the browser, enter:

```
$ firefox
```

OR

```
$ /usr/bin/firefox
```

Firefox Open URL

To open URL in a new tab, enter:

```
$ /usr/bin/firefox --new-window http://www.cyberciti.biz/
```

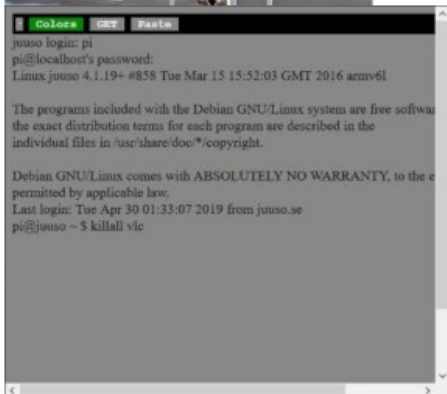

To open URL in a new window, enter:

```
$ /usr/bin/firefox www.cyberciti.biz
```
